ABOUT

Software engineer with a rigorous education in theoretical background coupled with practical and essential expertises needed for software engineering. I have a unique mix of communication, strategic thinking, time-management, and software development skills.

WORKFLOW

Project Skills

Agile Methodologies
Visual Studio
Linux Terminal
Object-Oriented Design
Software Testing
Problem Solving

Programming Languages

EDUCATION

B.S. Computer Science

Columbia College | 2016 - 2020

Computer Science Major and Mathematics Minor

- Completed Courses: Assembly Programming, Advanced Algorithms and Data Structures, Java and Python Programming, Artificial Intelligence, Database Systems, Software Engineering, Discrete Mathematics, and Cryptography
- Dean's List | *cum laude*

Interface Engineer

Cerner Corporation | 2020 - Present

- Configure and install Cerner interfaces and code basic interfaces
- Troubleshoot and resolve system interface issues
- Support interface testing during the life cycle of the project
- Perform and test data migration and conversion programs
- Write SQL queries and procedures to provide data to clients
- Write scripts to customize data that's sent and received from clients

Application Developer Intern

MidwayUSA | 2019 - 2020

- Responsible for creating, implementing, testing, and debugging source code
- Regularly maintained several applications and APIs
- Provided well-documented descriptions of code, tests and processes
- Evaluated existing applications and implement updates and modifications
- Communicated with several departments regarding ongoing application projects and database changes

Class: Senior Seminar

Columbia College | 2020

- Developed a fraudulent image detection software researching, understanding and using convolutional neural networks
- Learned, interpreted and implemented machine learning models
